

TECHNICAL DATA SHEET

RAP Paint & Varnish Remover

GENERAL DESCRIPTION

RAP Paint & Varnish Remover is designed to completely remove several types of coatings and finishes from multiple surfaces. Its specialized non-dichloromethane, semi-paste formulation has a heavier consistency to slow evaporation and easily strip most surfaces. RAP has been a trusted stripper brand for over 75 years.

DIRECTIONS FOR USE

Preparation: Use proper safety equipment (eyes, face, skin, hand, respiratory). Ensure all safety precautions are read and fully understood. Keep away from open heat, sparks, and flame.

1. Abrade the surface to be stripped for quicker removal time.
2. Mask any areas not to be stripped with masking tape and plastic covers.
3. Apply RAP liberally to the surface with a brush, medium sized paint roller, or putty knife so that the remover completely “masks” the surface to be stripped. Do not brush out too thin like a coat of paint, the most common mistake is not using enough remover.
4. Let the product set for 15 – 30 minutes.
5. Use a stiff putty knife to lift paint from flat surfaces or stripping pad to scrub surface.
6. Apply light amounts of water for final clean-up of residue. Surfaces should be completely dry before re-painting.
7. Clean tools promptly after use with soap and water.

Notice: RAP Paint & Varnish Remover is for industrial users only. Use only in a well-ventilated area with proper protective equipment.

*It is the responsibility of the user to test the material compatibility and method used to apply this product before actual application.

SUGGESTIONS

- Apply at temperatures between 60 - 80°F.
- Brush in the same direction when applying
- Keep container tightly sealed to prevent evaporation.

AVAILABILITY

Available in quart (32 fl oz) and gallon (128 fl oz).

STORAGE

RAP Paint & Varnish Remover will evaporate over time, not recommended for long term storage. Tightly cap and seal the container as best as possible. Store in the original containers in a cool, dark area away from hot surfaces, heat, sparks, flames and other sources of ignition. Store locked up in an area not accessible to children.

SAFETY

This product is flammable and considered a hazardous material. Do not handle until all safety precautions have been read and understood. Read the product label & safety data sheet (SDS) for information on proper handling, health risks, firefighting methods, spill procedures, emergency contact information, precautionary information, disposal information & more. Safety data sheets are available at www.casewayproducts.com or by emailing support@casewayproducts.com

Wear protective gloves, protective clothing, eye protection, face protection. This product should never be used in a poorly ventilated (confined) area and without a suitable respiratory mask. This product is intended for use by experienced individuals only.
